

Hospital Tours

For many people, going on a hospital tour is part of the preparations for getting ready for the Big Day.

Unfortunately, Grand River Hospital is so busy that hospital tours have had to be cancelled. It was frustrating for people to come to the hospital and not be able to see a room, because none were empty at the time.

The hospital has provided a video of the Childbirth Unit on their website. Please check our link on our Web Links page.

If, during your pregnancy, you and your midwife come to the hospital for a triage assessment, you may ask her if there is a room available to show you before you go home.
